Work Experience

- Helpshift Technologies Pvt Ltd 2021 - Present
Software Engineer 2
 - Work with **React and Reflux** for enhancing user experience and performance, collaborate with UX/UI designers to implement **responsive designs**, ensuring compatibility across various devices and browsers.
 - Integrate with **third-party integrations**, partnering with the product team to enhance and develop new features for **channels** like SMS, Facebook, Discord, and WhatsApp.
 - Use monitoring tools such as **Grafana** and **Kibana** to engage in proactive monitoring and efficiently resolve **on-call issues**.
 - Implement and manage **event-driven micro-service architecture** using **Kafka**.
 - Develop resilient REST APIs capable of handling 1500 RPS by employing **caching mechanisms** and robust **authorisation protocols**.
 - Design and **optimise database schemas** for high availability and performance.
 - Ensure **code quality** and maintainability through **code reviews**, automated testing, and adherence to best practices.
 - Participate actively in **recruitment processes**, evaluating and **onboarding** new team members, and providing mentorship.
 - Coordinate with multiple stakeholders throughout the **SDLC** within an **agile framework** to ensure seamless project delivery.
